## PRESENTATION

Hi, I'm Sepehr, a mobile developer. Throughout my career, I've gained a strong understanding of mobile development frameworks such as Flutter, and native iOS/Android. I specialize in developing, testing, and deploying mobile applications for both iOS and Android platforms. My expertise extends to programming languages such as Java, PHP, JavaScript, HTML, CSS and I'm experienced in mobile app architecture patterns such as MVC, MVVM, and Clean Architecture.

My experience also includes integrating APIs, and third-party libraries into mobile applications.

I'm confident that my expertise and experience would make me an asset to any company looking for a skilled and dedicated mobile developer.

## PROJECTS

- 01/04/2022 – Current

### **Notepass**

Mobile application that creates a list of complex passwords by processing data taken from any image and a keyword from the user.

Passwords are generated on the fly and saved on the device.

Preferred languages for development: Flutter - dart.

- 01/01/2019 – 01/03/2020

### **PX1**

PX1 is an application that can help composers realize their musical projects by giving them an extra boost in their creativity.

In short, this program takes any image as input and analyzes the pixels and draws values from them and transforms them into the control signal.

## ORGANIZATIONAL SKILLS

- **Management and organizational skills**

In both work and training experiences I have shown good organization and problem solving skills. I also developed good skills to work independently and also in a team, relating to various professional figures.

- **Motivation and consistency**

I am a constant person with a strong motivation in what I do, capable of setting myself goals and working to achieve them.
